

FOR IMMEDIATE RELEASE

Rota Technologies to Showcase Cutting-Edge Service Robots at Automate 2025

Detroit, Michigan – February 6, 2025 – Rota Technologies is excited to announce its participation as an exhibitor at **Automate 2025, North America's premier automation and robotics trade show**, taking place from May 12 to 15, 2025, at Huntington Place in Detroit, Michigan. attendees can visit Rota Technologies at **Booth 9220** to experience firsthand the innovative Keenon Service Robots that are transforming industries worldwide.

Automate 2025 is renowned for showcasing the latest advancements in automation, robotics, vision, motion control, and related technologies. The event offers a comprehensive platform for professionals to explore cutting-edge solutions that drive efficiency and innovation across various sectors.

At **Booth 9220**, Rota Technologies will feature a range of Keenon service robots, including models as the S100, T10, T8, T5, and T9. These robots are designed to enhance operations in industries such as hospitality, healthcare, retail, and logistics by providing efficient, reliable and user-friendly automated solutions.

Visitors to the booth will have the opportunity to interact with these state-of-the-art robots and learn how they can be integrated into various business operations to improve service delivery and operational efficiency. Rota Technologies' team of experts will be on hand to provide demonstrations and answer questions about the capabilities and benefits of Keenon's robotic solutions.

"We are thrilled to exhibit at Automate 2025 and showcase our partnership with Keenon Robotics," said John Knaffla CEO of Rota Technologies. "This event provides an excellent platform to demonstrate how our advanced service robots can revolutionize operation across multiple industries."

Automate 2025 is expected to attract a diverse audience of professionals seeking the latest automation solutions to enhance their operations. The event features a comprehensive conference agenda, including keynote sessions, workshops, and networking opportunities, providing valuable insights into the future automation and robotics.
